Purpose of the Course
This knowledge-based course (3 credit hours) is designed to clarify learning characteristics, needs and problems of the exceptional learner in the public schools. Perspectives on the Least Restrictive Environment (LRE) and categories of special education will be discussed. Special education derives from multiple psychological and educational fields of study. Federal and state laws and regulations, as well as the Council for Exceptional Children and INTASC, provide an outline of subjects and issues. Supporting information for this course is drawn from numerous resources.

After participating in this course, students will be able to:

1. Articulate the historical, philosophical, legal foundations, and state and federal regulations for services for children and youth with special educational needs.
2. Demonstrate an awareness of the models, theories, and research that provide the basis for practice in special education (individuals with exceptional learning needs from birth to adult years).
3. Identify the rights and responsibilities, including assurances and due process, of parents, students, teachers, other professionals, and school administrators as they relate to providing for learning needs.
4. Compare the cognitive, physical, cultural, social, and emotional needs of individuals with disabilities and/or gifts and talents with the needs of the general population of students.
5. Develop skills of collaboration and planning with families of individuals with exceptionalities, school personnel, related services personnel, and community agencies in a culturally responsive program.
6. Identify and select differentiated instructional practices to meet the needs of learners with diverse ability, culture, or socioeconomic class.
7. Recognize appropriate instructional strategies, services, and resources to meet the dynamic educational needs of learners with disabilities and/or gifts, talents, or high potential.
8. Describe referral and consultation strategies, ethical concerns, legal provisions, regulations, and guidelines related to assessment and placement of students in special education services.
9. Designate the roles of individuals with exceptionalities, parents, teachers, and other school and community personnel in planning an individualized program within the least restrictive environment.
10. Demonstrate appropriate use of technology, including adaptive and assistive technology, in creating a safe, positive, and supportive learning environment in which differences are valued.
